Computer Science in Shanghai Jiao Tong University

xfhelen@sjtu.edu.cn

Background Summary

- 201109-201506 Dalian University of Technology (DUT) BACHELOR DEGREE
- 201509-Present Shanghai Jiao Tong University (SJTU) PHD Degree

Scientific Research & Project Experience

Research and Implementation of Wireless Charging Device, 201404-201406.

- This project aims to achieve a wireless charging system in which coils transmit the electrical energy by resonance.
- Responsible for the theoretical exploration, analysis of theoretical models and obtainment of experimental data with MATLAB, as well as assistance to building circuits.
- The system can light up a power of 1W LED in approximate 50 cm distance.

Fingertips' Art, 201305-201311.

- This project aims to achieve a cross-platform web application with a certain effect of desertification.
- Using PHP, HTML5&CSS, CSS, and various frameworks implements all the functions of the front and after end.
- Mainly responsible for the design and implementation of the front-end interface and documents writing.
- Implemented application can run on Android, Windows Phone, IOS systems-based browsers.

FPGA-based Evaluation of the Cardiovascular System, 201305-201404.

- This project aims to achieve a FPGA-based evaluation of the cardiovascular system, based on Generic Algorithm, which using a combination of sensors and FPGA chips to predict Cardiovascular health.
- Responsible for using Verilog language to implement the Generic Algorithm.
- Implemented system is proved working well.

An Improved Method to Task Stack of uCOS-ii System, 201304-201305.

- This project aims to improve the stack structure of uCOS-ii system into a shared stack by all the running tasks.
- Completing independently.
- Improved system is proved to function well but I didn't take interruption situation into account.

ZIPC-based Logic Design and Simulation of TV Operation, 201405-201407.

- This project is launched by the Japan CATS Corporation. Logical design of TV control through embedded software design tools ZIPC and visual interface for simulation implemented by VB.
- Mainly responsible for project analysis and logic function design as well as implementation.
- The project receives the praise of CATS Corporation company.

Awards and Honors

Excellent Graduate in Dalian	Dalian Education Bureau, Liaoning, China	2014/12
Excellent Merit Student of DUT	Dalian University of Technology	2012,2013& 2014
CASC Scholarship	China Aerospace Science and Technology Corporation	2014/10
Innovation and Technology Scholarship	Dalian University of Technology	2014/10
National Endeavor Fellowship.	Dalian University of Technology	2012 & 2013
Kaiyuan Scholarship	Shanghai Jiao Tong University	2016/10
Merit Student of SJTU	Shanghai Jiao Tong University	2016/10
